

## The Law of Attraction and the Science of Getting Rich - By Andrew Gerrie

What are you thinking about right now? The Law of Attraction states that "whatever we think about, we bring about". This law may initially seem like new age fluff but believe it or not, there are scientific merits to this proposition. The top quantum physicists of our time have discovered that our universe and our reality is very much directed by the "observer".

When studying quantum particles (the smallest observable unit of matter), these scientists discovered that such particles behave in accordance with the person conducting the experiment. If the scientists "predict" that quantum particles behave in a certain way, they do. And yet, if the scientists "predict" that quantum particles behave in another way, they do. It is the "observer" that dictates the outcome of the experiment!

What does all this mean for us normal people? Well actually, these scientific experiments have far reaching implications for us as our world is made up of these same quantum particles! In this case, we are the "observer" the director and hence the creator of our reality, our world and our experience.

So, be careful of what you think about! for example, have your thoughts ever begun with the following phrases:

I don't understand...

I don't want...

I'm frustrated that...

I hate my...

I can't figure out ...

I'm stressed about...

I'm worried that...

I should be able to... but I can't...

Why am I having so much trouble?

The Law of Attraction indifferent to the words preceding your thought. Whatever you think about you will attract into your life. When you think "I don't understand why bad things always happen to me?", you are "attracting" bad things into your life. When you think "I want to get out of debt", you are attracting more debt into your life. When you think "I'm worried I will get sick", you are attracting sickness into your life! The Law of Attraction brings about what you focus on even if it is not what you want. Get it?

If you understand this principle, here are some examples of how to make the law of attraction work to support you rather than to act against you. Try observing your thoughts and changing your thinking in the following way:

"I want to get out of debt" to "I want to earn amazing riches"

"I hate my boss" to "I look forward to owning my own business"

"I don't understand why he is so lazy" to "I love it when he helps out around the house"

"I'm stressed about this project" to "I always create amazing results in my projects"

"I'm worried about getting sick" to "I experience vibrant health daily"

Now that we have a better understanding of the Law of Attraction, it is no surprise why so many people struggle with regards to money. It is been said that "the rich get richer while the poor get poorer". This is actually the Law of Attraction in action. Because the wealthy have money, they often think about how to best use their money and hence they attract more money. The poor on the other hand often think about their present lack of money and unfortunately, that also attracts lack into their lives. Currently, 96% of the world's wealth is being earned by just 1% of the population!

To address this issue, the main teachers behind the movie is launching a program called "The Science of Getting Rich" and it is based on employing the law of attraction to create wealth. This amazing program is based on the principles and philosophies outlined in a book of the same title written in 1910 by Wallace D Wattles. This is the same book that inspired the movie.

What is the Science of Getting Rich about? Well in the words of Wallace D. Wattles, "The ownership of money and property comes as a result of doing things in a certain way. Those who do things in this certain way, whether on purpose or accidentally, get rich. Those who do not do things in this certain way, no matter how hard they work or how able they are, remain poor. It is a natural law that like causes always produce like effects.

Therefore, any man or woman who learns to do things in this certain way will infallibly get rich." The Science of Getting Rich Seminar is all about teaching how to do things in this "certain" way to create wealth.
